## Sealless Magnetic Drive Pump

The Ansimag KP is a self-priming, sealless magnetic drive, non-metallic centrifugal end suction pump, which is suitable for chemical processing and other general industry applications.

The KP delivers:

- Flows to: 285 GPM (65 m<sup>3</sup> / hr)
- Total Dynamic Head: 150 ft

Simple by design, Sundyne Ansimag pumps deliver world class performance in a remarkably compact footprint. With no seals or mechanical couplings to leak or fail, these pumps are the safest choice for those looking to protect personnel and the environment. Additionally, Sundyne sealless pumps feature fewer wetted parts than competitive products and a powder coat finish to prevent corrosion, delivering enhanced durability, optimal reliability and lower through-life costs over traditional sealed pumps. Built to meet exacting ASME / ANSI B73.3 chemical process pump standards, Sundyne sealless pumps are dimensionally interchangeable and represent the easy upgrade option from standard mechanically sealed pumps.
