

# OFFSHORE.

**Proven Solutions for Offshore Applications.**

**GENUINE SUNDYNE – THE WORLD LEADER IN LOW FLOW HIGH HEAD PUMPS & COMPRESSORS FOR ONSHORE AND OFFSHORE OIL AND GAS PRODUCTION.**

Safe, reliable, compact, efficient and compliant production.

**RELIABILITY REALIZED.**

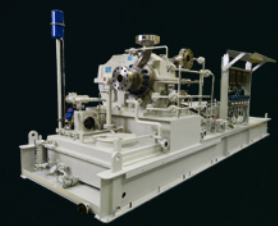

**RECIPROCATING SEALLESS DIAPHRAGM COMPRESSORS**

- H<sub>2</sub>S Removal

**LMC LINE MOUNTED COMPRESSOR, VERTICAL INLINE, INTEGRALLY GEARED CENTRIFUGAL**

- Injection
- Scrubbing
- Off Gas / Vent Gas
- Dehydration
- Regeneration
- H<sub>2</sub>S Removal
- Flare, Vent
- Fuel Gas

**HMP INTEGRALLY GEARED, MULTI-STAGE CENTRIFUGAL PUMPS**

- Injection

**OH6 VERTICAL INLINE, INTEGRALLY GEARED CENTRIFUGAL PUMPS**

- Injection

**OH2 MODULAR PROCESS PUMPS; RADIAL SPLIT, END-SUCTION, OVERHEAD SINGLE & DOUBLE VOLUTE**

- Separation
- Process

**OH3-5 VERTICAL INLINE DIRECT DRIVE CENTRIFUGAL PUMPS**

- Process

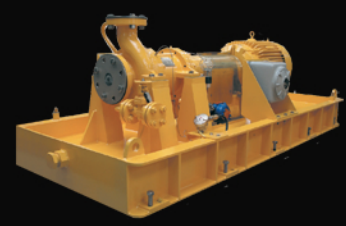

**ANSI B73.3, ISO 2858, HORIZONTAL, SEALLESS MAGNETIC DRIVE PROCESS PUMPS**

- Process

**ANSI B73.3, ISO 2858, HORIZONTAL, SEALLESS MAGNETIC DRIVE PROCESS PUMPS**

- Process

**OH2 SEALLESS MAGNETIC DRIVE, CENTERLINE MOUNTED, SINGLE STAGE OVERHUNG IMPELLER PUMPS**

- Separation
- Process
- Scrubbing
- H<sub>2</sub>S Removal

**BB5 SEALLESS MAGNETIC DRIVE, CENTERLINE MOUNTED, MULTI-STAGE PUMPS**

- Injection
- Process

**BB3 HEAVY DUTY PROCESS PUMPS; AXIAL SPLIT, MULTI-STAGE**

- Injection

**BB2 MEDIUM DUTY PROCESS PUMPS; RADIAL SPLIT, DOUBLE VOLUTE BETWEEN BEARINGS; ONE OR TWO STAGES**

- Process
- Transfer

**BB1 AXIAL SPLIT PROCESS PUMPS; SINGLE OR DOUBLE SUCTION**

- Process
- Offloading
- Transfer
- Produced Water

**OIL PLATFORM**

- Wellhead Production
- Separation
- Process
- Transfer
- Offloading
- Produced Water
- Flare, Vent, Reinjection
- Fuel Gas

**FPSO (Floating Production, Storage & Offloading Vessel)**

- Wellhead Production
- Separation
- Process
- Transfer
- Offloading
- Produced Water
- Flare, Vent, Reinjection
- Fuel Gas

**FLNG (Floating Liquefied Natural Gas Vessel)**

- Scrubbing
- Process
- Dehydration
- Regeneration
- H<sub>2</sub>S Removal
- Flare, Vent
- Fuel Gas

**OH4 SEALLESS MAGNETIC DRIVE, CLOSE COUPLED VERTICAL INLINE PUMPS**

- Separation
- Process
- Scrubbing
- H<sub>2</sub>S Removal

**ANSI B73.2, ISO 2858 VERTICAL, PLASTIC-LINED, SEALLESS MAGNETIC DRIVE PROCESS PUMPS**

- Process

**VS2 VERTICAL MOUNTED, DOUBLE SUCTION IMPELLER PUMPS**

- Transfer
- Offloading
- Produced Water

**VS4 VERTICAL INLINE SHAFT; SEALED AND SEALLESS PUMPS**

- Transfer
- Offloading

**VS6 VERTICAL CAN, MULTIPLE STAGES, RADIAL SPLIT CASE PUMPS**

- Transfer
- Offloading

Whether your platform is fixed or floating, Sundyne has the expertise to develop a custom pump or compressor package for your offshore application. We know that crew safety and protecting the environment are of paramount importance to every offshore platform, that is why we design our products from the frame up to meet stringent API guidelines to eliminate process fluid leaks, as well as maximize reliability and uptime. We extensively test every unit before shipping to ensure smooth on-site start-up and long, trouble-free service cycles; plus, Sundyne pumps and compressors feature compact footprints and are built around a streamlined, modular design philosophy that allows for fast, self contained preventive maintenance, thus minimizing downtime and keeping your operation at peak productivity. That's RELIABILITY REALIZED.
